Winter Salt Management Program

# Get Smart About Salt

Winter salt helps keep us safe but it also causes damage to our footwear, cars, buildings, plants, wildlife and water. We can all play a part in getting smart about salt.

- 1. Shovel the snow. Save the salt for ice.**
- 2. Prevent ice patches:**
  - Ensure eaves don't drip or drain onto walkways and driveways.
  - Store snow so the melt water won't go on paved areas.
- 3. Treat ice patches:**
  - Create traction with kitty litter or sand.
  - Remove ice with a steel ice chopper.
  - Melt ice with salt applied according to package instructions. Give salt time to do its work.

If you hire a contractor or your property is non-residential, visit [smartaboutsalt.com](http://smartaboutsalt.com) to learn about our Smart About Salt Certification programs.
